Ticket Talk is a new two-way communication feature available as an option to all Delmarva811 system users. This tool was created to improve communications between excavators and operators/locators.

Excavators have requested a system that enables two-way communication via the Delmarva811 locate ticket system, allowing them to both respond to messages initiated by operators or locators and initiate messages themselves. This new option is designed to enhance clarity and reduce miscommunication by facilitating direct, real-time communication between parties. All messages will be stored within the Delmarva811 system and can be accessed via the Ticket Check/Locator Tickets and My Tickets platforms.

Test messages are being sent showing the new ticket header along with new information contained in the remarks field for these ticket revisions. Please contact the center at sstultz@missutility.net if you need additional test tickets transmitted or have any questions.

For software vendors who use special receiving software, changes are needed to your receiving software to accept this new ticket revision. Please contact sstultz@missutility.net to obtain another copy of the webservice requirements document. The center expects to implement this new ticket feature by December 23, 2025. To ensure seamless access to this new feature, we recommend promptly updating your software and conducting thorough testing.
